Data Definitions

Total Geographic Score: The total score for a geographic area is based on a composite score of the measures listed under the "general" heading. These "general" measures are aggregated for each geographic area and then ranked against all other corresponding geographic areas. The geographic areas are ranked in ascending order with the lowest aggregate number receiving a ranking of 1.

Individual Measures and Rankings:				
Measure	Description	Time Period	Ranking	Source/Link
General:				
Unemployment	Measures the percent of Missouri labor force that was unemployed Missourians Unemployed: 139,722 Missouri Labor Force: 2,970,127	2001	Geographic areas were ranked in ascending order. A geographic area with the lowest unemployment in the state would receive a ranking of 1.	Missouri Department of Economic Development (Preliminary data - United States Bureau of Labor Statistics) www.ded.state.mo.us
Percent of Poverty	Measures the percent of the Missourians that were at or below 100% of the federal poverty level (FPL) Missourians below 100% of FPL: 637,891 Missourians Counted for Poverty: 5,433,293	2000	Geographic areas were ranked in ascending order. A geographic area with the lowest poverty in the state would receive a ranking of 1.	United States Census Bureau, 2000 Census www.census.gov
Per Capita Income	Measures the average personal income based on Missouri population Missouri Average Personal Income: \$26,404	1999	Geographic areas were ranked in descending order. A geographic area with the highest per capita income in the state would receive a ranking of 1.	Missouri Department of Economic Development (United States Bureau of Economic Analysis) www.ded.state.mo.us
Percent of Single Parent Households with Children	Measures the percent of Missouri households with children under 18 that were headed by a single parent Missouri Households with Children Under 18 Headed by Single Parents: 202,578 Missouri Household with Children: 699,779	2000	Geographic areas were ranked in ascending order. A geographic area with the lowest percent of households with children in the state would receive a ranking of 1.	United States Census Bureau, 2000 Census www.census.gov
Percent of Births to Unmarried Mothers	Measures the percentage of all Missouri births that were to an unmarried mother Missouri Births to Unmarried Mothers: 26,209 Missouri Births: 75,290	2001	Geographic areas were ranked in ascending order. A geographic area with the lowest births to unmarried mothers in the state would receive a ranking of 1.	Missouri Department of Health and Senior Services, Missouri Information for Community Assessment (MICA) www.dhss.state.mo.us
Percent of Births to Mothers Under 18	Measures the percentage of all Missouri births that were to mothers under 18 years of age Missouri Births to Mothers Ages Under 18: 2,938 Missouri Births: 75,290	2001	Geographic areas were ranked in ascending order. A geographic area with the lowest births to mothers under 18 years of age in the state would receive a ranking of 1.	Missouri Department of Health and Senior Services, Missouri Information for Community Assessment (MICA) www.dhss.state.mo.us
Percent of Population with High School Graduation	Measures the percentage of students that graduated from high school in Missouri Missouri High School Graduates: 53,648 Missouri High School Graduates and Dropouts: 65,920	2001	Geographic areas were ranked in descending order. A geographic area with the highest high school graduation in the state would receive a ranking of 1.	Missouri Department of Elementary and Secondary Education www.dese.state.mo.us

Additional Data Used:

All Population Data Missouri 2000 Population: 5,595,211	2000		www.census.gov
Metropolitan Statistical Area or MSA	Metropolitan Statistical Area or MSA is defined by the United States Office of Management and Budget according to published standards that are applied to Census Bureau data. According to the 1990 standards, each new qualifying MSA must include at least: one city with 50,000 or more inhabitants, or a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000 (75,000 in New England). Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). For the MSA Fact Sheets, only Missouri counties are used to present the measures.		www.census.gov
